EDUCATION

Barcelona School of Economics

Master Program in Economics & Finance

Barcelona, Spain

09/2025– 07/2026

Relevant courses: Advanced Panel Data Methods, Nonparametric Methods & Distributional Analysis, Nowcasting & Forecasting, Financial Econometrics

Thesis: *Who Absorbs the Remittance Shock: The Migrant Worker or the Household?*

Degree awarded by Universitat Pompeu Fabra and Universitat Autònoma de Barcelona

University of North Carolina at Chapel Hill

Bachelor of Science in Economics

Philosophy, Politics, & Economics (PPE) Minor

Chapel Hill, USA

08/2019– 05/2023

RESEARCH EXPERIENCE

Resource Allocation under Uncertainty & Network Dynamics

Researcher

Personal Project

11/2025–Present

- Developing a general equilibrium model in MATLAB to simulate multi-agent trade under uncertainty.
- Programming algorithms to solve Walrasian equilibria and core, validating against the Welfare Theorems.
- Modeling network structures with intermediaries to analyze how coalitions impact market efficiency.
- Constructing 3D spatiotemporal visualizations to track the density of goods & utility across populations

Duke University

Teaching Assistant

Durham, USA

06/2024–01/2025

- Imported & cleaned raw economic data from BEA and FRED using R to model industry profit trends
- Investigated key trends of important macro indicators during recessions & expansions in Excel & R
- Designed interactive dashboards that dynamically display updated macro indicators and corporate profits
- Developed automated tables in Excel that refreshes new macro data and dynamically updates charts.

University of North Carolina at Chapel Hill

Researcher

Chapel Hill, USA

02/2024– 04/2024

- Analyzed a data set with over 32,000,000 observations using various machine learning methods
- Predicted customer repurchasing behavior in R with a gradient-descent boosting accuracy of 88.4%
- Visualized models & hyperparameter tunings via importance plots, confusion matrices, & ROC curves.

University of North Carolina at Chapel Hill

Researcher

Chapel Hill, NC

07/2023– 08/2023

- Modeled regressions in STATA on DHS panel data to predict health outcomes of women & children
- Found evidence that a new family planning policy was effective in increasing modern contraceptive usage

TECHNICAL SKILLS & LANGUAGES

Software & Tools: R, MATLAB, Stata, Python, SQL, Excel, LaTeX, Quarto

Analytical Methods: Causal Inference, A/B Testing, Time Series Forecasting, Spatial Economics, ML

Languages: English (Native), Spanish (Intermediate)

ADDITIONAL INFORMATION

- Systematic Literature Review Volunteer, Water Institute, University of North Carolina at Chapel Hill, 2024
Read, filtered, and sorted systematic literature relevant to WASH research focuses
- Research interests: Causal Inference, Game Theory, Public Policy, Health Econometrics, Networks
